Summary

Software Engineer with a Master's degree in Artificial Intelligence and hands-on experience at Amazon as a Software Development Engineer Intern. Skilled across the full software development lifecycle and with a strong background in both front-end and back-end development, with academic expertise in deep learning, natural language processing, and computer vision. I am passionate and meticulous about my work, continuously seeking to improve through new technologies and industry best practices.

Work Experience

Software Developer Engineer (Internship)

Madrid, Spain

AMAZON

May. 2025 - Nov. 2025

Worked both front-end and back-end to enhance checkout experience for Amazon Business customers by improving discoverability and accessibility of multi-address shipping features in checkout.

- Worked on the whole timeline of project development, from writing design documents, implementing the new features, designing and updating unit, integration, and UI tests, and finally launching the feature.
- Helped on team efforts like resolving tickets, fixing bugs, reviewing push requests, and creating and updating documentation.
- Worked on fixing and updating pipelines to maintain an effective Continuous Integration/Continuous Delivery workflow.

Full-Stack Web Developer

Castellon, Spain

TEKSAN

Nov. 2024 - Jan. 2025

Redesigned and rebuilt an outdated company website from the ground up, enhancing performance, usability, and security.

- Developed a modern, responsive front-end using React with Bootstrap.
- Engineered a robust back-end with TypeScript and Firebase Firestore and Authentication, implementing scalable data management and secure authentication.

Game Developer (Internship)

Castellon, Spain

FIRESALE STUDIO

Feb. 2020 - May. 2020

- Developed an inventory system for a "choose your story" style text game, which offered an intuitive and engaging UI for the player.
- Designed and developed multiple mini-games for a children's games app from scratch, including puzzles and memory-based games, aiming to improve and develop children's memorization skills and abilities.

Education

Masters in Artificial Intelligence

Cork, Ireland

MUNSTER TECHNOLOGICAL UNIVERSITY

Sept. 2024 - May. 2025

Masters of Science with a study focused on topics such as deep learning, natural language processing, and machine vision.

Bachelors (Honours) in Software Development

Cork, Ireland

MUNSTER TECHNOLOGICAL UNIVERSITY

Sept. 2023 - May. 2024

RESTful web services (Spring Boot) and mobile applications development (Native Android Development), progressive web applications (Javascript), machine learning (scikit-learn), big data analytics (Spark), and experience in containerization (Docker and Kubernetes).

Bachelors in Computer Engineering

Castellon, Spain

JAUME I UNIVERSITY

Sept. 2020 - June. 2023

Bachelors with a focus on programming, software engineering, systems administration, networks, databases, and business management.

Advanced Technician in Multiplatform App Development

Castellon, Spain

IES CAMINÀS

Sept. 2018 - June. 2020

Systems configuration and management, native application development with Android Studio, multimedia integration, and ERP-CRM systems management.

Awards & Qualifications

MTU NetApp's Hackathon

Cork, Ireland

2ND PLACE WINNER

Feb. 2025

Awarded second place in a Hackathon designed by NetApp where participants had to tackle a series of problems related to NetApp's data storage solutions and develop a solution using Python.

Accreditation exam for technical professionals who have gained knowledge in the areas of building infrastructures for AI workloads.

Projects

Online resume/portfolio website

Github Pages

PERSONAL WEBSITE

1 month - 2024

Designed and developed a fully responsive personal website that serves as an online resume/portfolio to showcase my professional journey, skills, and projects. The website was built using React and Bootstrap.

Development of a Mod for the video game Minecraft

CurseForge

DARK AETHER CORRUPTION

7 months - 2023/2024

Designed, developed, and tested new content using the Forge API in Java, including new Entities' AI, procedural world generation, and terrain-modifying mechanics.
